## Secura Key offers New 2-door Access Control Kits!

**CHATSWORTH, CALIFORNIA** Secura Key announces two new models of their highly successful e\*Access Kits.

e\*ACCESS kits contain everything you need to install a two-door access control system – just add door locks and cabling! These convenient kits are very popular because they offer the lowest cost-per-door in the industry for a two-door panel.

These two new **e\*ACCESS5** and **e\*ACCESS6** “Starter Kits” are provided without cards, allowing the dealer to custom order credentials, in cases where the 25-pack of ISO cards with standard artwork is not appropriate. Kits 5 and 6 are for customers who prefer keytags or those who need cards with no printing, custom printing, or a specific facility code or numbering.

Kits 5 and 6 contain the SK-ACP panel, a power supply, two readers, SK-NET™ software, a user manual, and a cable that connects the panel to a PC. Kits 1 and 2 include all the above, plus a starter pack of 25 e\*Tag cards. The e\*ACCESS 3 & 4 Add-On Kits include only the panel, power supply and two readers, allowing the dealer to get kit pricing without paying for the extra components.

“The reception for e\*ACCESS kits by new and existing dealers is incredible,” says Charles Anthony, Secura Key Regional Sales Manager. “These new Add-On kits make it even easier for dealers to be competitive, now when the need for security is up, and security budgets are tight.”

### About Secura Key

For over 35 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key’s modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key’s manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>.
