Secura Key Develops Quick Reference Guide For Resellers and Customers

CHATSWORTH, CALIFORNIA - Secura Key has just published a Quick Reference Guide, which allows resellers and customers to view and compare Secura Key product features on a single two-sided sheet. This extremely well received guide covers Radio Key® Proximity products, e*Tag® Contactless Smart Card products, Standalone Access Control Units, and e*Access Kits. Thumbnail photos and specs are included for each product.

The Quick Reference guide helps customers match the appropriate product with its application, by correlating customer requirements with specific products. It also shows which software versions and hardware components are required for various system configurations. It explains the difference between various e*Access kits, and compares Proximity and Contactless technologies.

This informative document is available on Secura Key's website, www.securakey.com when you click on What's New. You can also contact us for printed copies.

About Secura Key

For over 35 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>. [To learn more about Secura Key, click here.](#)
