Secura Key Launches New RFID Flat Pad Antenna For Library Applications

Secura Key announces the release of its new Model **ET-ANT 13x9** flat pad antenna for read/write desktop applications, such as library checkout, inventory systems, or other track and trace applications requiring the reading of any articles, documents and books which are identified with HF contactless labels. The **ET-ANT 13x9** is an extremely thin package at 0.30", which makes it easy to slide articles across. It has a Lexan top cover and a rubber cushioned bottom pad to prevent sliding. It has an 8-ft cable fitted with an SMA connector, and an MMCX adapter is also included. Impedance is 50 Ohms.

The Secura Key ET9-USB-1 reader is an excellent match for this antenna. It plugs into a standard USB port on a laptop or desktop computer, and provides enough power to read an HF label at 8-9", using the ET-ANT 13x9. This reader is the same size as a USB flash drive, and requires no other external electronics or power. The ET9-USB-1 reads and writes to 13.56 MHz ISO 15693 tags or labels. It is a pass-through device which allows an application to communicate directly with an HF tag or label.

About Secura Key

For over 40 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>.
