Secura Key Offers
Lockdown and Door Status Features

CHATSWORTH, CALIFORNIA - In response to many requests from Dealers, System Integrators and End Users, Secura Key has now released SK-NET™ Version 5.20 Access Control System Software, featuring two new, critically important features: System Lockdown and Real-Time Door Status Reporting.

Security officials at Schools, Courts, Government Offices and other facilities which may be targets of crime or terrorism need the ability to lock or disable groups of doors with a single command in order to react to internal or external threats, and they also need to know the real-time status of controlled doors in their facility.

These features work with either the Secura Key SK-ACPE-LE or the NOVA.16 (SK-MRCP) access control panels and Smart Readers.

SK-NET™ provides three progressively more secure Lockdown levels:

>Level 1 -Global Lock - cancels all Manual or Door Zone unlock commands.
>Level 2 -Global Inactive for Lockdown Group – also places all doors in inactive mode.
>Level 3 -Global Lockdown for Lockdown Group - also disables REX or 'remote open' inputs.

The Door Status icon color indicates off-normal Door Status conditions:
- No color indicates all doors are secure.
- Green indicates unlocked doors
- Yellow indicates doors held or propped open
- Red indicates doors forced open

SK-NET™ allows the designation of Override Cards, which can be issued to Campus Police, or First Responders (Police, Fire or EMTs.) Override Cards allow access at any reader, whether inactive or locked, providing authorities with the access required to capture or neutralize an assailant.

Secura key has authored a new White Paper entitled System Lockdown and Door Status Features, which explains how Lockdown can be implemented using an access control system, together with recommendations on securing the physical installation. This White Paper is available on the Secura Key website, www.securakey.com

About Secura Key

For over 40 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at http://www.securakey.com.
