## UL vs ETL

SECURA KEY uses ETL SEMCO division of Intertek to perform our regulatory testing to the UL 294 and CUL294 standards, as well as CE Mark compliance.

Manufacturers are not required to use UL for their compliance testing. The only major requirement is that the laboratory performing the testing is an OSHA recognized Nationally Recognized Testing Laboratory (NRTL). Consequently, our ETL Listed Mark serves as an indicator of compliance with applicable product safety standards. And like the UL Mark, the ETL Listed Mark is recognized and readily accepted by manufacturers, retailers, distributors and authorities having jurisdiction (AHJs).

This certification mark indicates that the product has been tested to and has met the minimum requirements of a widely recognized (consensus) U.S. product safety standard, that the manufacturing site has been audited, and that the applicant has agreed to a program of periodic factory follow-up inspections to verify continued conformance.

If the mark includes a small US and/or C, it follows product safety standards of United States and/or Canada, respectively.

ETL Testing Laboratories has been conducting electrical performance and reliability tests since 1896. Intertek Testing Services (ITS) acquired ETL from Inchcape in 1996. ITS is recognized by OSHA as a Nationally Recognized Testing Laboratory (NRTL), just as Underwriters Laboratories (UL), Canadian Standards Association (CSA) and several other independent organizations are recognized.

ITS tests products according to nearly 200 safety and performance standards. The ETL Listed Mark and C-ETL Listed Mark are accepted throughout the United States and Canada when denoting compliance with nationally recognized standards such as ANSI, IEC, UL, and CSA.

Intertek provides product safety testing and certification for a wide range of industries. In their *Directory of Listed Products*, which is easily accessed at [www.intertek-etlsemko.com](http://www.intertek-etlsemko.com), you'll find over 40,000 products from telephones to x-ray machines, manufactured by companies like AT&T, Dell, Ericsson, General Electric, Panasonic and Philips.

**Smart. Reliable. Secure.**
