New 2-door Access Control Add-On Kits from Secura Key

CHATSWORTH, CALIFORNIA - Secura Key announces two new models of their highly successful e*Access Kits: **e*ACCESS3 and e*ACCESS4 ADD-ON kits**.

The original e*ACCESS kits contain everything you need to install a two-door access control system – just add door locks and cabling! These convenient kits are very popular because they offer the lowest cost-per-door in the industry for a two-door panel. e*ACCESS1 features mullion-style readers, while e*ACCESS2 features wallswitch-style readers.

All kits contain the Secura Key's SK-ACP panel, a power supply, and two readers. Kits 1 and 2 also include SK-NET™ software, a user manual, a cable that connects the panel to a PC, and a starter pack of 25 e*Tag® cards.

The e*ACCESS 3 and 4 Add-On Kits do not include the software, cables and cards, allowing the dealer to get kit pricing *without paying for the extra components they don't need*.

"The reception for e*ACCESS kits by new and existing dealers is incredible," says Charles Anthony, Secura Key's Regional Sales Manager. "Once the dealer understands how much product they are getting for their money, making the switch to Secura Key is a given, considering the ease-of installation, ease-of use and reliability of the SK-ACP 2-door panel and SK-NET™ Access Control Software. These new Add-On kits make it even easier for dealers to be competitive, now that the need for security is up, and security budgets are tight."
