## Secura Key Offers Updated Card Ordering Guide

**CHATSWORTH, CA** - Secura Key announces an update to its Card Ordering Guide, which allows resellers and customers to have a reference tool for all aspects of the card ordering process. The guide includes available card types, instructions on choosing formats and various printing options for all technologies in the Secura Key Catalog.

Significant changes include the addition of Wiegand Card Ordering information, as well as changes to the Custom Printing Procedures.

Wiegand Card Ordering information was previously provided on separate forms, but is now incorporated into the Card Ordering Guide, so that the popular legacy Wiegand Swipe cards can be easily ordered – The Guide now includes illustrations of the standard Wiegand art files.

This ordering guide has been rewritten to include Secura Key's new policy on Custom Artwork. Secura Key has reduced artwork setup charges to a one-time flat fee, so that existing custom artfiles do not require a new printing charge every time, but they do require a 250 card minimum.

Information on dye sub printing of cards has been updated, as well as the technical requirements for custom artwork.

This new card capabilities guide is available in PDF format on the SECURA KEY website, by clicking [SUPPORT/SALES SERVICE/Ordering Guides](#).

### About Secura Key

For over 40 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>.
