Secura Key Publishes RFID Card Capabilities Guide

Secura Key announces the publication of its new e*Tag Card Capabilities Guide. This document helps RFID customers to learn about the various options available for Secura Key's RFID credentials, such as package sizes, Inlay sizes, Inlay types and manufacturers, custom encoding, custom graphics and printing, variable data (bar codes and numbering) encoding to match bar codes, laser numbering, inkjet numbering, and special form factors.

The guide features photographs of sample artwork used by actual customers for various applications. It also shows standard artwork layouts, and it includes a guide on how to order cards with custom artwork.

The guide presents all of the available credential options, so that the customer can select the credential that is exactly suited to their application.

This new card capabilities guide is available in PDF format on the SECURA KEY website, by clicking [Support/Sales & Service/Order Guides](#)

About Secura Key

For over 40 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>.
