Secura Key Releases New RK65K
Product Training Tutorial

Secura Key, of Chatsworth, California is pleased to announce the completion of a new PowerPoint Product Training Tutorial for its popular RK65K Standalone Access Control Unit. It is available on the Secura Key website, www.securakey.com by clicking on Support, then Training/Tutorials.

The RK65K is one of the industry's most popular standalone proximity readers, controlling up to 65,000 cards and programmed with a passive hand-held programmer.

The PowerPoint tutorial includes information on installation, operating and troubleshooting the RK65K, and includes product features, wiring and mounting instructions, configuration and programming procedures, and information on how to connect the unit to an access control panel, using its Wiegand output connection.

Secura Key continues to add to its online training program. According to Secura Key's Technical Training Manager, Jeff Hamilton, "This is a low-cost alternative to for dealers who don't have the time or resources to send technicians to California for factory training. It also allows technicians in the field with Internet access to get installation and troubleshooting tips on demand."

The RK65K product training will also be offered periodically as a live interactive webinar conducted by Jeff Hamilton (check the Secura Key website for scheduling and registration information). Secura Key is also able to offer one-on-one training sessions for individuals or small groups by special request.

Secura Key products are available through major distributors of security, access control, locking hardware and gate control equipment.

About Secura Key
For over 38 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at http://www.securakey.com.
