Secura Key Releases version 4.02 of SK-NET™ Access Control Software

CHATSWORTH, CALIFORNIA - Secura Key, is pleased to announce the release of the latest and most advanced version of SK-NET™ to date. SK-NET™ Version 4.02 includes enhancements allowing the software to work better with SK-EZ/ID Photo Badge Design and Printing Software when large numbers of photos, and/or large photo file sizes are used. It adds an activity log entry for User Add, Delete, and Modify, as well as various other improvements. It also works with Microsoft® Windows 7, Vista, and XP.

SK-NET™ software controls a network of SK-ACP 2-door access control panels, allowing up to 100 panels per location. It can connect to the network via RS-232, RS-485, or TCP/IP. The SK-NET-MLD version allows multiple locations connected via TCP/IP or dialup modem, and the SK-NET-MLD-CS version allows client-server operation and multiple simultaneous users. SK-NET uses the Sybase Advantage database, which is ODBC compliant.

Version 4.02 continues SK-NET's tradition of being easy to learn and easy to use. SK-NET controls access for up to 65,000 cardholders. SK-NET offers eight different languages, context sensitive help, graphical time zones, anti-passback, limited use, and many other features. Options include Multi-User Client/Server versions, integration with the Remote Eyes® Video Management System, and SK-EZ/ID card printing software. Secura Key products are available through major distributors of security, access control, locking hardware and gate control equipment. For those interested in learning more about SK-NET software, you can attend one of our Training Webinars. To sign up for the next session, visit www.securakey.com/SUPPORT/Training.htm

About Secura Key

For over 39 years, Secura Key has manufactured access control and RFID products, pioneering the use of new card technologies in the security industry. Reader technologies include contactless smart cards, proximity, and other leading technologies. Secura Key's modern card/tag production plant is expert at packaging a wide variety of Access Control and RFID transponders in durable plastic packages, featuring 4-color graphics, custom form factors and encrypted data.

Secura Key's manufacturing plant and general offices are located in Chatsworth, California. Further information on Secura Key is available at <http://www.securakey.com>.
